Section 1: Basic Science

History and Physical Examination of the Hip
History and Physical Examination of the Knee
Radiographic Evaluation of the Hip
Radiographic Evaluation of the Knee
Biomechanics of the Hip
Biomechanics of the Knee
Nonsurgical Management of Hip Pain
Nonsurgical Management of Knee Osteoarthritis
Perioperative Treatment of Patients Undergoing Arthroplasty
Blood Management in Arthroplasty
Economics of Total Hip and Total Knee Arthroplasty
Outpatient Total Joint Arthroplasty
National Joint Registries
Retrieval Analysis of Hip and Knee Protheses
Venous Thromboembolism in Knee and Hip Arthroplasty

Section 2: Hip

Surgical Anatomy of the Hip
Hip Arthroscopy and Periacetabular Osteotomy: Surgical Techniques
Total Hip Arthroplasty: Bearing Surfaces Basic Science
Bearing Surface Options: Wear, Stability, and Revision
Alternative Implant Designs: Hip Resurfacing
Primary Total Hip Arthroplasty for Osteoarthritis: Acetabular Component
Primary Total Hip Arthroplasty for Osteoarthritis: Femoral Component
Primary Total Hip Arthroplasty for Other Indications: Developmental Dysplasia of the Hip
Primary Total Hip Arthroplasty for Other Indications: Hip Fractures
Total Hip Arthroplasty for Other Indications: Inflammatory Arthritis
Primary Total Hip Arthroplasty for Other Indications: Oncologic Resection and Reconstruction
Arthroplasty and Nonarthroplasty Solutions for Osteonecrosis of the Hip
Primary Total Hip Arthroplasty for Other Indications: Post-Septic Arthritis
Primary Total Hip Arthroplasty for Other Indications: Posttraumatic Arthritis
Advanced Technologies in Primary Total Hip Arthroplasty

Section 3: Revision Total Hip Arthroplasty

Evaluation and Workup in Revision Total Hip Arthroplasty

Extended Trochanteric Osteotomy

Bone Loss Classification

Component Removal in Revision Total Hip Arthroplasty

Acetabular Component Revision

Femoral Component Revision

Section 4: Complications After Total Hip Arthroplasty

Limb Length and Offset

Intraoperative Neurovascular Injury

Intraoperative Periprosthetic Fractures

Postoperative Adverse Local Tissue Reaction

Aseptic Loosening After Total Hip Arthroplasty

Postoperative Hip Dislocation

Postoperative Heterotopic Ossification

Postoperative Periprosthetic Fractures of the Femur and Acetabulum

Periprosthetic Joint Infection

Postoperative Polyethylene Wear and Osteolysis

Section 5: Knee

Surgical Anatomy of the Knee

Implant Designs in Total Knee Arthroplasty

Unicompartmental Knee Arthroplasty

Alternative Arthroplasty Options: Bicompartmental, Bicruciate-Retaining, and Patellofemoral Knee Arthroplasty

Nonarthroplasty Management of Knee Osteoarthritis

Alignment Strategies in Total Knee Arthroplasty

Primary Total Knee Arthroplasty for Osteoarthritis

Primary Total Knee Arthroplasty for Other Indications: Posttraumatic Arthritis of the Knee

Primary Total Knee Arthroplasty for Other Indications
